### R 1250 RT (K52/11) Accessory Overview

**Overview:** For the R 1250 RT model, the original BMW Motorrad range of accessories offers a large selection of customization options that leave nothing to be desired. The options available start with HP parts and range through multiple storage options as well as a number of design components. Options also include versatile ergonomics for added comfort, safety related features, a modern navigation device and modern communications systems. Many of the familiar and tried-and-tested products have been continued from the predecessor model and, once again, the overall range of equipment has been significantly expanded.

- The standard cases can be combined with a small or large topcase options in numerous colors, each with an optional interior bag. An additional storage compartment with practical internal partitioning for documents and other small items is also available for the large topcase.
- The bag for the luggage rack or the functional tank bag with optional variable insert provides additional storage space.
- The chrome-plated items add visual accents to the motorcycle which include the following: handlebar weights, exhaust silencer, case strips, and topcase lid cover.
- Further design highlights are set by the following new parts of the exclusive Option 719 in various versions: front and rear wheels, front and rear cast wheels, cylinder head covers, engine housing cover, hand levers, and covers for clutch and brake reservoirs.
- The following HP parts underline the sporty character of the machine: cylinder head covers, engine housing cover and covers for clutch and brake reservoirs.

- The individual comfort requirement is met by the comfort or small windshield and various seat options (standard, high, low), each with and without seat heating; the passenger seat comes with and without seat heating.
- The Navigator VI provides an attractive navigation system, which is operated comfortably using the motorcycle's Multi-Controller.
- The additional LED headlights and the additional brake lights for the topcase provide a higher level of active safety.
- The cylinder-head cover is completely protected against scratches and stone chips by the cylinder-head cover protector.
- The wide range of accessories is completed by well-known products that can be used in all models such as the safety plug for the oil filler port, vehicle cover, tire pressure travel pack, large or small first-aid kit, BMW Motorrad battery charger, and various care products.

**Parts Information:** Please see the attached list on the following pages for detailed parts information.

**Note:** Prices listed are M.S.R.P. and may be subject to change.
