R nineT Accessory Overview:

R nineT(K21, K21/11), R nineT Pure (K22), R nineT Scrambler (K23), R nineT Racer (K32), R nineT Urban GS (K33)

Overview: The original BMW Motorrad accessories program offers a wide range of customization options for all R nineT derivatives, from HP Parts, to storage space and multiple design components, to adaptations to the exhaust system, various ergonomics and safety features as well as modern navigation devices.

- The R nineT is the top model from the R nineT derivatives - a powerful BMW boxer in the design of a classic Roadster. The life cycle impulse meets the new statutory requirements (exhaust emission standards Euro 4, intensified noise emission) and also takes into account a clear differentiation to the lower-priced derivatives.
- The R nineT Pure is a foundational and expressive motorcycle created for motorcycle enthusiasts who love the simple and reduced form.
- The R nineT Scrambler is a motorcycle that revives the Scrambler era in a very special way.
- The R nineT Racer resurrects the legendary Superbike era of the 1970s to 1980s with models such as the R 90 S and is aimed specifically at customers who want an air-cooled Boxer in a motorsports-oriented concept.
- The R nineT Urban G/S revives the genes of the very first and legendary BMW R 80 G/S from the year 1980 and, using modern technology, adapts it to modern times in the form of a classic BMW motorcycle with an opposed-twin engine in Enduro style.
